On Friday, September 1st, 1905, Lucile, the 12-months-old baby of Mr. and Mrs. Arthur Catheart, closed its eyes to earthly things, and went back to its Maker. Lucile was a very pretty child, of a sweet disposition, and the loving father and mother had surrounded it with all the love and attention possible, but the Master's call was answered promptly, and another angel was added to the happy throng above. The little one was sick only a few hours, congestion of the brain and lungs being the cause of its death. REJOIGING OVER THE SMALL DEATH RATE

New Orleans People Believe They Control Situation.

OUTSIDE TOWNS CALL FOR AID

The Federal and State Authorities Are Doing All in Their Power to Help Rural Communities-Steamer Resumes Trips.

New Orleans, Sept. 13 .- Showers and sunshine in the day time with cooler nights continue here but contrary to expectations there is no resulting increase in the mortality which, in the past, has been heavy under such adverse meteorological conditions.

There was little change in the yellow fever situation today. Dr. War. ner is impressing upon the people the necessity of guarding against indifference.

"It is true," said Dr. Warner, today, "that owing to the lectures of Dr. Kohnke, the doubting Thomases, like the mosquitoes, have grown less, but mosquito can do great damage. have not stopped it entirely. greatest langer to my mind is the failure of physicians to recognize yellow fever and therefore I say that every citizen might promptly to report sickness whether it is in his own home or in his neighbor's. It will do no harm, and it may save many lives."

Excellent Effect of Death Rate.

The clean score in the matter of deaths in the preceding 24 hours has had a most excellent affect on the people of New Orleans, and in such evidence that the fever is under control to respond to the appeal of Dr. White to exert themselves to the utmost in the war against the mosquito. It is felt by the authorities not to be a matter of great difficulty to stamp out the fever, if the people will faithfully follow instructions now that the mulignant character of the disease has disappeared.

Appeals continue to come to the governor and the state board of health from the country for assistance. Leeville has been in need of help and Governor Blanchard is to send money there while the wholesale merchants here hav contributed a carload of provisions. Tailulah is in the throes of despondency but Dr. Chassaignac and a staff of nurses are scheduled to reach there today and it is believed that the town thereafter will again take heart.

People continue to leave Lake Prov. idence, and the authorities are making no effort to detain them because the fewer number of people who remain in the town the sooner will the disease be checked for want of material.

Four new cases of fever have appeared at LaFourche crossing, where there was fever about six weeks ago. but the settlement is completely isolated and it is thought that the disease can be prevented from spreading. The Patterson situation is still serious and the community is completely out of

People in the country tributary to the Ouachita river have been shut off from New Orleans for nearly seven weeks, and are in sore peed of provisions and merchandise. Recently they appeal ed to local merchants and the board of trade for relief and the starting of the Hayne is the result. The steam. er will be permitted to discharge and receive freight under such regulations as local health boards may impose.
